The common grade scale is what we use to report to parents. We assign grades to students after we make professional judgements on students' learning based on rich evidence. We get this rich evidence through assessment.
Understanding the common grade scale

Each grade level describes three important elements: the learning contexts, the quality of knowledge and understanding, and the quality of skills.

So, for the A grade descriptor, we need to make decisions in students' learning based on these three things:

- learning context statements — “readily applies knowledge … to new situations”
- the quality of knowledge and understanding — “extensive knowledge and understanding”
- the quality of skills — “a very high level”.

‘A’ GRADE DESCRIPTOR
Teacher Judgements…

- Gather a wide range of evidence – before, during and after learning.
- FOR – formative assessment. This occurs throughout the teaching and learning process to clarify student learning and understanding.
- AS - Students ask questions and use assessment feedback for new learning.
- OF – Summative: during a unit of work or at the end of a unit, term or semester, and may be used to rank or grade students.

**CHOOSING THE RIGHT GRADE**

If a student receives a Grade C in the middle of the year and again at the end of the year they will be making progress.

Between the two reporting periods the student will have learned new knowledge and skills of a more advanced nature.

To receive a Grade C on the second occasion the student must have

*a sound knowledge and understanding of the main areas of content and has achieved an adequate level of competence in the processes and skills* in relation to this new and more challenging material.
